Use of ePortfolios in Health Professions Education

Sunday, June 18 2023 5:30 pm-7:00 pm IRST | 2:00pm- 3:30 pm GMT

Join us for a webinar on the transformative power of ePortfolios in medical education! An ePortfolio is not just a documentation tool, but also a powerful learning tool that promotes reflection and integration of academic and non-academic experiences. In this session, we will explore the many ways that ePortfolios can be utilized throughout the medical education continuum. Attendees will learn how to use ePortfolios to assess academic work, facilitate reflection, and connect topics across courses and assignments. Join us to discover the potential of this technological tool for your own learning and growth.

We can expect to see the following outcomes:

- Describe the utilization of ePortfolio in medical education continuum
- Use ePortfolio for their own learning
